As there are many different types of phones, we recommend that for operating functions you consult your phone's manual for availability and operation. The following information will allow you to easily utilise some GSM services.

SMS

Your mobile phone lets you write, send and receive messages with SMS.

SMS is easy to use and is very convenient.

As most mobiles have different keys and menu items, you may need to refer to your phone's manual if you have any problems.

VOICEMAIL

If you can't take a call, Voicemail can do it for you. Whether your phone is switched off, busy, your battery's flat or you're out of range, callers can hear your personalised greeting and leave a message[^].

To activate Voicemail, the first thing you need to do is set up your Voicemail mailbox. As well as the following instructions, voice prompts will help you in using Voicemail when you call the service.

[^] *Deposit and retrieval charges apply. Monthly charges may apply.*

Setting up your Voicemail service

From your mobile phone, press:

[1] [0] [1] [SEND]. The first time you reach your Voicemail, voice prompts will guide you on how to set up your mailbox.

To change your settings at any time, press: [1] [0] [1] and from the Voicemail Main Menu, press:

[1] TO RECORD YOUR PERSONAL GREETING

Can be up to five minutes long and changed at any time.

[2] TO RECORD YOUR NAME

This is important as it lets callers know whose Voicemail service it is, especially when sending voice messages to each other.

[3] TO CHOOSE YOUR PIN

Use a number that is easy to remember. The number can be 4 to 6 digits long and changed at any time.

This helps keep messages secure and allows you to access them from a phone other than your mobile.

[4] TO SET UP YOUR AUTOPLAY STATUS

You can choose to have your messages played one after the other as soon as you dial the Voicemail Main Menu.

[8] FOR HELP

Listening to, saving and deleting messages

From your mobile phone, press:

[1] [0] [1] [SEND]

Messages will start playing automatically if AutoPlay is on. If you don't have AutoPlay on, press [1] to listen to messages.

After you have listened to your messages:

- Press [1] to REPLAY
- Press [5] to DELETE
- Press [6] to SAVE

HINT. You can press these options while listening to the message to save time. Once you have selected an option, Voicemail will move on to the next message.

Voicemail shortcuts and hints

How to tell if you have a message

Your mobile will either beep and/or send an SMS message to your screen. If your phone can't receive SMS messages, your phone will ring and a recording will let you know you have a message.

Storing messages. With Voicemail, you can store 20 messages of up to five minutes at any one time. New messages are automatically kept for seven days. Once played, messages are kept for 14 days unless you delete them.

INTERNATIONAL ROAMING

As a Southern Cross Telco customer you can use your phone in many countries around the world.

Southern Cross Telco is available in over 100 countries across more than 200 networks.

Call charges and services vary from country to country.

How to use International Roaming

Before you go overseas. Contact Southern Cross Telco by calling **1300 855 728** to have International Roaming activated on your phone.

This service CANNOT be set up once overseas.

We recommend you allow a minimum of three working days prior to departure to ensure activation upon arrival at your destination.

When you arrive at your destination, turn on your mobile phone, wait a few seconds to gain access to a network (as long as you are in the coverage area) and you are ready to go.

FAX AND DATA

Mobile Fax and Data will assist you if you need a mobile office.

By connecting your mobile phone to your laptop, palmtop or PDA using a PC card and the right software, you can send and receive faxes and emails and access the Internet.

Refer to your handset user guide or contact your handset manufacturer for further details.

CALL FORWARDING

Call Forwarding lets you forward calls from your mobile phone to another number or message service.

Charges apply for forwarded calls.

Calls can be forwarded to most numbers in Australia.

To turn on Call Forwarding, press: [*] [*] and choose from the following:

[6] [1] RING, NO ANSWER.

Forwards calls after 20 seconds of ringing.

[6] [2] NOT REACHABLE.

Forwards calls when your phone is off and/or out of range.

[6] [7] BUSY.

Forwards calls when your phone is engaged.

NOTE. These codes are already programmed to forward calls to Voicemail. To change them, you need to program each code, one at a time.

[2] [1] ALL CALLS.

Forwards all calls except SMS text messages.

Then press: [*] and dial the number where you want your calls to go.

e.g. Your office or home number, Voicemail [1] [0] [1]

e.g. If your office number is 03 7012 4567 and you forward on Not Reachable you'd dial:

[*] [*] [6] [2] [*] [0] [3] [7] [0] [1] [2] [4] [5] [6] [7]
[#] [SEND]

To turn Call Forwarding off, press:

[#] [SEND]

To check Call Forwarding status, press:

[*] [#] and dial the code you're checking (see above)
[#] [SEND]

CALL WAITING

When you're on a call it lets you know another caller is trying to get through. If you're waiting for an important call, you can put your first call on hold, take the second, then return to the first.

How to use Call Waiting

You're on a call and hear the Call Waiting beeps.

To take the call, press:

[2] [SEND]

Your first caller is put on hold automatically while you take the other call.

To switch between callers, press:

[2] [SEND]

The second caller is put on hold automatically while you speak to the first caller.

To hang up, press:

[1] [SEND]

Ends the current call and returns you to the other caller.

To ignore Call Waiting, just ignore the beeps or press:

[0] [SEND]

If Call Forwarding is on, the call will go to that number or message service.

To turn on Call Waiting, press:

[*] [4] [3] [#] [SEND]

To turn off Call Waiting, press:

[#] [4] [3] [#] [SEND]

To check Call Waiting status, press:

[*] [#] [4] [3] [#] [SEND]

CALL ENQUIRY
